Subject: Website Architect - PMP Volunteer Needed

The Society needs a volunteer to recommend a configuration and an operating plan for its website. Three separate projects aimed at providing additional on-line capabilities are now concluding, and the Society needs to make a decision on the site hosting service it should seek, and on the assignment of duties for site operation and maintenance.

A PMP with experience in choosing the infrastructure and software, and in establishing an operating regime for websites, is invited to prepare a recommendation to the Society. This is a small site with very modest functionality, but it must be configured with a view to extremely low maintenance and the greatest possible economy. An experienced architect can likely complete this assignment with a total effort of one day, including a briefing meeting on November 1, 2006 to obtain the background and requirements.

If you can help with this assignment, please reply to Alberto Cayuela, with a brief summary of your qualifications and availability:
ACayuela@stantec.com

Please let us know if you wish to receive notices from the Society at a different e-mail address.
